PROFILE

I am a JavaScript Developer that focuses on front end frameworks like react and next.js. I have a passion for algorithms, blockchain and serverless technologies such as AWS and Google Cloud. To grow my skills, I focus on building a full-stack application for a media company called Loudr Online.

EMPLOYMENT

06/2017 – 09/2017

Web Developer Intern | Enplan Group

I utilized HTML, CSS, and JavaScript to implement web design mockups and create dynamic landing pages to improve the firm's brand and help attract more customers. I developed new user interface features and conducted user testing to gather feedback on websites. I made the process of contracting the firm easier and increased first-time contracts by 35%

06/2018 – 08/2018

Web Developer Intern | Zikoko Online Magazine

I worked with the development team to help maintain a RESTful media blog that attracted over 50,000 visitors daily. I developed testing procedures to ensure the quality of the application. I investigated bugs and resolved them promptly.

RELEVANT EXPERIENCE

Spark IT Bootcamp - Web Developer Student

Focused on building projects and learning to work as a team with tight deadlines, without constant guidance from instructors. Learned how to use Git alongside several other workflows and how to quickly pick up multiple technologies and adapt them to team goals.

Loudr Online - Co-Founder & Lead Developer

I built and maintain a blog that focuses on promoting fashion and entertainment culture. The tools used are WordPress, vercel, next.js, graphql and graphcms. We currently have over 500 weekly visitors.

EDUCATION

Spark Developer Bootcamp

Lagos, Nigeria

12-week long bootcamp focused on web development, HTML, CSS, JavaScript, Bootstrap and Git.
