Profile

- Creative minded individual with interests in disruptive technology.
- Continuous learner with the ability to quickly adapt to new technologies and environments.
- Fantastic team player with good communication skills.
- Ability to handle highly stressed situations and unexpected errors in an efficient manner.
- Excellent organizational, and coordination skills.

Employment

06/2017 – 08/2017
Lagos, Nigeria

Web Developer Intern
Zikoko Online Magazine
During my summer vacation, I interned at a Media Company.
- I worked with the development team to help build and maintain a RESTful media blog that attracted thousands of visitors daily
- Wrote code to create dynamic user interfaces and web applications
- Implemented various website designs
- Developed testing procedures to ensure the quality of the websites
- Investigated website issues and resolved them promptly

06/2018 – 10/2018
Lagos, Nigeria

Web Developer Intern
Enplan Group
The professors at my university had a union strike, so I interned at an engineering firm.
- Wrote code to create dynamic landing pages to help attract more contractors
- Developed new user interface features
- Utilized HTML, CSS, and JavaScript to create website prototypes
- Implemented website design mockups
- Conducted user testing to gather feedback on website prototypes

01/2019 – present
Lagos, Nigeria

Co-founder and Lead Developer
Loudr Online
An online blog/ media company I started with my friends
- Designed and built web applications
- Developed and maintained codebases
- Contributed to open source projects
- Provided support and training to new developers
- Successfully launched and grew startup business
- Managed teams of up to 5 people
- Scaled applications to support thousands of views daily

02/2022 – present
Atlanta, United States

IT network administrator assistant
iTech eServices
I maintain the office network with about a hundred users
- Installed and configured new servers
- Updated software and security patches
- Monitored server performance and availability
- Responded to system alerts and troubleshooting issues
- Implemented backup and recovery procedures
- Maintained network documentation

Experience

Twitter Meme Bot
I built a twitter meme bot using JavaScript that creates a meme when you use a particular hashtag and got over 5,000 likes on one tweet.

RGB Color Game
I built a game that polishes your RGB skills using vanilla JavaScript. You choose which one of the options of colors matches the RGB color code that appears to the screen.

ERC-20 Compliant Crowdfunding Token
I built a crowdfunding website that issues a token which can represent shares to every investor.

Education

08/2016 – 05/2020
Lagos, Nigeria

Electrical & Electronics Engineering | B.Eng
University of Lagos

02/2021 – present
Atlanta, United States

Information Technology | B.Sc
